

MANUFACTURING IN LINCOLN

Manufacturing employed more people in Lincoln in 2017 than any other sector. The number of jobs in manufacturing grew by 15.2 percent from 2012 to reach 1,665. This is nearly double the rate of growth for Niagara region, while Ontario showed no growth over the same 2012 to 2017 period. Also, over the past decade, Lincoln manufacturing employment does not appear to have suffered as much from the 2008-2009 recession as many other parts of Niagara region, in good part due to the growth trend of the beverage manufacturing sub-sector.

Employment: job growth is double of the Niagara Region

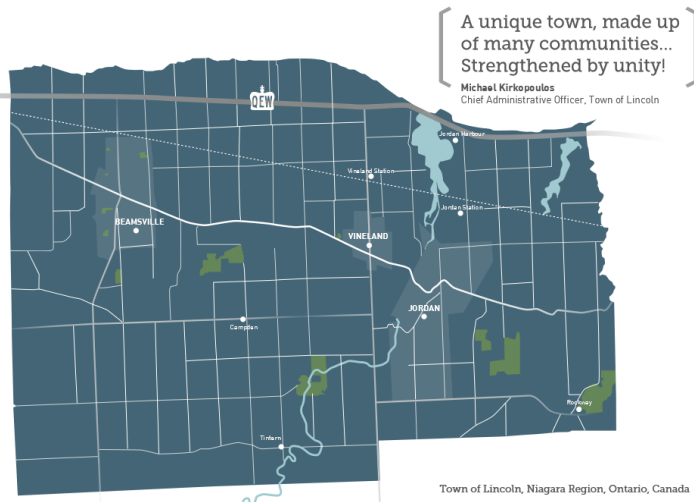

15.2% since 2012
